

DANIEL PATTERSON

Business & Data Analyst | Reporting Automation, Reconciliation & Quantitative Analytics

Tampa, FL • 772.486.6481 • dpatterson6575@gmail.com • danielpatterson1.github.io/Daniel-Patterson-portfolio • linkedin.com/in/daniel-patterson-b03a5718b

PROFESSIONAL SUMMARY

Quantitative business analyst with a progressive track record spanning accounting, data analysis, and audit-driven reconciliation work within a large, highly regulated enterprise. Builds automated reporting and reconciliation pipelines in R, Python, SQL, and DuckDB that turn high-volume transactional data into executive-ready dashboards and measurable financial recovery — including a \$971M cash-to-posting reconciliation platform (98.5% match rate) and a duplicate-payment analytics initiative that identified \$3.62M in overpayments at ~99% validation accuracy. Comfortable owning a project end to end: scoping requirements with stakeholders, building the pipeline, validating results, and presenting findings to leadership. Prior background as a commercial loan broker adds working familiarity with credit risk, underwriting, and financial due diligence. Currently pursuing an M.S. in Analytics at Georgia Tech, degree expected December 2028.

CORE COMPETENCIES

Data Reconciliation & Anomaly Detection • Automated Reporting Pipelines • Executive Dashboard Development • Audit Analytics & Process Controls • Quantitative Validation & Testing • Cross-Functional Stakeholder Delivery • Regulatory Compliance (HIPAA) • Credit Risk & Underwriting Fundamentals

PROFESSIONAL EXPERIENCE

Business Process Analyst III

Jul 2026 – Present

Encompass Health — Business Services Office | Tampa, FL

- Designed and built an automated cash-reconciliation dashboard matching **\$971M+ in enterprise deposits** against payment-posting activity, achieving a **98.5% match rate** and isolating \$4.3M in exceptions for operational follow-up; standardized identifier-matching logic across five previously incompatible data sources.
- Promoted in recognition of automation and audit impact; took ownership of enterprise-wide bad debt reporting, scaling a single-location pilot into a standardized reporting framework covering the full multi-site portfolio for executive leadership.
- Built and iteratively enhanced an executive performance-reporting suite consolidating KPIs, root-cause analysis, and site-level trends into a leadership dashboard, coordinating across analytics, operations, and finance stakeholders through multiple validation cycles.
- Automated a vendor-verification and refund-accuracy process end-to-end into a recurring report distributed automatically to accounts-receivable teams, removing a manual review step and reducing the risk of misdirected payments.
- Centralized duplicate-payment monitoring into a single analytics platform with trend, heat-map, and workload-distribution views, expanding real-time leadership visibility into payment-integrity risk organization-wide.

Business Process Analyst II

Dec 2025 – Jul 2026

Encompass Health — Business Services Office | Tampa, FL

- Independently reconciled charge, receipt, adjustment, insurance, and balance data to validate account-level accuracy for a placement-holds audit, and built an automated exception report using DuckDB to catch records silently dropping out of active inventory undetected by standard reconciliation files.
- Designed and deployed a fully automated due-diligence report with mass-upload logic, surfacing **\$671K in actionable backlog within its first month** and projected to support ~\$1M in write-offs; expanded scope and enhancements drove measurable inventory reduction through mid-2026.
- Engineered a daily automated duplicate-payment report triggered by posting-team confirmation, giving executive leadership real-time visibility into credit-balance posting accuracy.
- Authored a team-wide reporting layout standard and documentation guidelines adopted across the department and presented to senior leadership, while onboarding and mentoring an analyst intern on audit procedures.

Accounts Receivable Analyst III

May 2025 – Dec 2025

Encompass Health — Business Services Office | Tampa, FL

- Led a duplicate-payment analytics initiative identifying **\$3.62M in overpayments at ~99% validation accuracy**, a quantitative anomaly-detection effort directly supporting recovery, compliance, and audit-readiness.
- Performed root-cause analysis on duplicate-payment patterns, driving control changes that cut daily duplicate postings by **~60% month-over-month**, and built SQL/Excel-based reporting tools to analyze high-volume payer, billing, and denial data for operations leadership.

Accounting Assistant

Aug 2024 – May 2025

Encompass Health — Business Services Office | Tampa, FL

- Managed payment allocation and financial reconciliation across a portfolio of 15 facilities, investigating and resolving high-dollar payment discrepancies to improve financial accuracy and revenue-tracking outcomes.

Data Analyst / Strategic Planner

May 2021 – Apr 2024

Vegas Golf the Game | Port St. Lucie, FL

- Supported operational planning and cash-flow tracking through forecasting models and performance reporting, contributing analysis that informed day-to-day resource-allocation decisions.

Commercial Loan Broker

Aug 2017 – May 2021

The BA Fund | Stuart, FL

- Analyzed client financial statements and business performance metrics to structure and underwrite commercial lending solutions, managing the deal pipeline from prospecting through closing as part of the founding team.

EDUCATION & CERTIFICATIONS

- Georgia Institute of Technology (Georgia Tech) — M.S. in Analytics (OMSA) — In Progress, degree conferral expected Dec 2028
- University of South Florida (USF) — B.A., Economics & Econometrics — Dec 2024
- Google Data Analytics Certificate — Coursera — June 2025

TECHNICAL SKILLS

- **Languages & Analytics:** R (R Markdown, ggplot2), Python, SQL, DuckDB, ETL concepts, statistical analysis & validation
- **Reporting & Visualization:** HTML dashboards, Excel (Power Query, XLOOKUP, Pivot Tables), Tableau, Power BI, PowerPoint
- **Governance & Controls:** Audit analytics, reconciliation, documentation standardization, regulatory compliance (HIPAA), process controls
